***Status of the Claims***

Claims 33-34, 36, 39-40 and 43 have now been presented for examination.

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 33-34, drawn to a screening assay for inhibitors of MLK kinase, classified in class 435, subclass 15.
- II. Claims 36, 39-40 and 43, drawn to a method of treating neurological disorders with inhibitors to MLK activity classified in class 514, subclass unknown.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the method of treatment involves totally different steps from the screening assay.

Other known inhibitors of MLK could be used in the treatment method.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

***Species***

Claims 33, 36, 40 and 43 are generic to a plurality of disclosed patentably distinct species comprising neuronal diseases such as Huntington's, Alzheimers, glutamate or kainic acid

Art Unit: 1651

mediated excitotoxicity, etc. Applicant is further required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed if Group II is elected.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jon P Weber, Ph.D. whose telephone number is 703-308-4015. The examiner can normally be reached on daily, off 1st Fri, 9/5/4.
